

About the
INSTALL Warranty on Labor 2015

INSTALL now offers a groundbreaking Warranty on Labor program. Information about the Warranty includes the following:

- The warranty shall provide an additional warranty on the work performed for customers or clients of INSTALL Warranty Contractors.
- Projects under this program can be commercial or residential.
- Warrantied flooring must be installed by INSTALL certified flooring installation professionals who are working for a recognized INSTALL Warranty Contractor.
- Covered installations are those tasks that are contained within the skill-sets evaluated within the INSTALL Certification for carpet, resilient, or hardwood, held by the installer(s) of the work.
- The warranty provides an additional \$25,000 per claim or project.
- Each project's warranty expires two years after the work was completed.
- The program is presented by The International Labor-Management Committee for the Floor and Wall Covering Industry (INSTALL Committee).

About INSTALL

INSTALL is an Alliance of 120+ floorcovering mills, manufacturers, hundreds of contractors and thousands of installers working together to address the needs of the industry by standardizing effective installation training and certification across the United States and Canada.

INSTALL trains, certifies, and then provides skilled, productive professionals to contractors, who then are able to keep projects on time, on budget and work according to specifications. Because INSTALL partners with industry manufacturers; architects, project owners and facility managers know that INSTALL crews will be experienced in working with the specified flooring because that product's manufacturer helped train those floorlayers.

INSTALL also serves as an ongoing resource for specifiers across North America, regarding technical and specification information for all types of flooring installation scenarios.
